Summary

AI software developer with years of progressive experience and master's degree in Cloud-based Software Engineering. Proven expertise in quality assurance (6 years at Amazon), complemented by 2+ years of Full-Stack development with React, Angular, Node.js, and AWS cloud architecture. I currently design AI-agent and automation workflows that integrate enterprise systems. Specialized in test automation (Playwright, Jest, JUnit), CI/CD pipeline validation, Infrastructure as Code and AI automation workflow.

Work Experience

Kimbtron Oy | AI Automation trainee | Aug 2026 – till now

- Design and build production AI-agent and automation workflows (n8n) that integrate ERP, CRM and HR systems, replacing manual data handling with reliable automated pipelines. Develop internal AI and data tools, taking proof-of-concept ideas through to deployed, measurable solutions for client organizations.

Newelo Oy | AWS Cloud Developer | Finland | Sep 2023 – Oct 2024

- Architected and deployed production AWS environments (EC2, RDS, S3, DynamoDB) with automated CI/CD pipelines for e-commerce platforms including Ideapark Lempäälä. Implemented secure serverless cloud infrastructure for startups as master's thesis, utilizing Terraform, Docker, and serverless framework as IaC.

Neuro Event Labs Oy | Junior Software Developer | Finland | Sep 2022 – April 2023

- Developed front-end solutions for medical video-based seizure detection application using AngularJS and TypeScript. Handled DevOps processes through GitLab CI/CD and AWS infrastructure deployment.

Amazon India | Quality Assurance Associate | India | June 2015 – April 2021

- Executed weekly test cases for Amazon's internal process validation and SOP compliance using Excel-based data analysis (pivot tables, VLOOKUPs), reducing cross-team dependencies through Kaizen defect resolution. Mentored 5-person QA team on Amazon validation standards achieving faster query handling with zero critical escalations while conducting regression testing and root-cause analysis across global marketplaces.

Software skills

Cloud	-	AWS (Lambda, VPC, API Gateway, S3, Cognito, EC2)
Frontend	-	React.js, Next.js, HTML, CSS, JavaScript
Security	-	Cognito, VPC and SSH Linux hardening, Secrets Manager, role based and IAM access control
AI	-	n8n workflow automation, AI agent workflows, AI data tooling and integration
Backend	-	Node.js, Python
DevOps	-	GitLab CI/CD, Docker, Terraform, Serverless Framework
Databases	-	DynamoDB, PostgreSQL, MongoDB, MySQL
Testing	-	Jest, Junit, Playwright frameworks
Familiar	-	Angular, Typescript, REST APIs, C++, PHP, Git, Jira
Data	-	Python, SQL, Excel

Projects

- **Ideapark E-commerce Platform** | Led end-to-end DevOps and frontend development for live e-commerce platform using AWS infrastructure (EC2, RDS, S3) and React JS. Implemented automated CI/CD pipelines ensuring seamless deployment and high availability.
- **Master's Thesis** | Designed and implemented cost-effective serverless architecture template for startups using AWS Lambda, API Gateway, VPC, Cognito and DynamoDB. Automated deployment with Serverless Framework, including JUnit testing.
- **Video-Based Seizure Detection Platform** | Implemented front-end solutions for a medical video analysis application using AngularJS/TypeScript while supporting AWS infrastructure and GitLab CI/CD processes.
- **ClearNest** – Family Management App | Built a household management app with Next.js, Supabase, TypeScript, real-time syncing, Kanban task boards, habit tracking, shared shopping lists, and inventory alerts.
- **FirstNest** – Real Estate Platform | Built a full-stack property search and listing application with React, Node.js, MongoDB, authentication, advanced filters, and mortgage calculator functionality.
- **Industrial SCADA Dashboard** | Developed a vanilla JavaScript HMI dashboard for industrial monitoring, including diagnostics, trends, alarms, and a custom SPA router without framework dependencies.
- **Language Learning Application** | Built Full-Stack platform with React frontend and Node.js/SQL backend featuring admin panel for content management. Implemented secure authentication, input validation, automated CI/CD pipeline, data encryption, and containerized architecture for scalable cloud hosting.
- **Digit Recognition App**| Developed ML digit recognition system using React, Python Flask, and Azure Cognitive Services. Implemented containerization with Docker, orchestrated Kubernetes deployment, and integrated multilingual translation/speech features for accessibility in Azure.
- **Industrial Dashboard** | Battery Monitoring System. Delivered a real-time fleet battery monitoring dashboard with diagnostics, health tracking, charts, and resilience via a serverless API with offline caching fallback.

Education

- Master’s degree – Cloud based Software Engineering | Vaasan ammattikorkeakoulu (VAMK) 2025
- CyberStart: Cybersecurity programme (Central Baltic / EU Interreg) 2026
- Diploma – Full stack development | Tampereen ammattikorkeakoulu (TAMK) 2022
- Bachelor’s degree – Electrical and Electronics Engineering | Anna University 2015
- Playwright: Web Automation Testing | Udemy 2025
- Data Engineering Foundations with IBM | Coursera 2025
- Terraform Associate | HashiCorp 2023
- AWS Certified Solutions Architect Associate | HashiCorp 2023
